

# Environmental Laboratory Technician

## Classification:

This is a Full Time permanent position, located in Juneau, Alaska.

Admiralty Environmental is looking for a dynamic person to join the firm as an Environmental Laboratory Technician in our Juneau, Alaska office. This position will be responsible for supporting a variety of projects that include environmental sampling, laboratory analysis, and project management for a variety of industrial clients in the cruise ship, mining, and wastewater treatment industries. This is an excellent opportunity for an environmental professional to work with a well established and technically diverse firm on challenging environmental water quality issues.

## Key Duties:

- Planning and managing field sampling projects in coordination with the general manager (writing and preparation of sampling plans; coordination with and oversight of subcontractors and regulators; and environmental sampling of groundwater and wastewater);
- Working in field teams consisting of 1 to 3 members, emphasizing proper environmental sampling procedures and health and safety;
- Operating a remote mobile laboratory, for two- to three- week periods, in both domestic and international settings;
- Analyzing water samples and interpreting environmental chemistry data using laboratory instrumentation;
- Database management;
- Writing and preparation of reports and other technical documents;
- Interaction with clients and regulatory agencies;
- Assisting in developing presentations; and
- General office tasks and supervision.

Headquartered in Juneau, Alaska, Admiralty Environmental is a leader in water sampling, laboratory analysis, and project management for public and private sector clients. Our employees help Admiralty Environmental deliver innovative, practical, and technically sound results and solutions — helping clients meet increasingly stringent environmental regulations and manage their systems to operate in an environmentally sound manner. To fulfill this mission, Admiralty Environmental is seeking an environmental professional who has a passion for working on challenging projects that will grow their professional skills.

## Job Requirements

Qualified candidate will have the minimum of:

- Bachelor's degree in Geology, Biology, Chemistry, Environmental Sciences, or Engineering;
- 1 to 3 years of relevant experience;
- Strong writing, communication, and computer skills;
- Ability to work in the field in industrial settings; and
- Proven ability to work independently with some supervision, as well as proven ability to effectively work in and/or lead larger project teams. Frequent overnight travel will be required. Must be 21 or over.

Applications are available on our website at:

# Seasonal Environmental Technician

## Classification

This is a Full Time seasonal position, located in Juneau, Alaska.

Admiralty Environmental is looking for dynamic individuals to join the firm as seasonal Environmental Technicians in our Juneau, Alaska office from May – September, 2016. This position will be responsible for supporting a variety of projects that include environmental sampling, laboratory analysis, and project management for a variety of industrial clients in the cruise ship, mining, drinking water and wastewater treatment industries. This is an excellent opportunity for an entry-level environmental professional or college upperclassman to work with a well-established and technically diverse group on challenging environmental water quality issues.

## Key Duties

- Assisting on field sampling projects, including environmental sampling of groundwater and wastewater;
- Analyzing water samples in the laboratory and interpreting environmental chemistry data;
- Data entry and data validation;
- Interaction with clients and regulatory agencies,
- Assisting in report writing, and
- General office tasks.

Headquartered in Juneau, Alaska, Admiralty Environmental is a leader in water sampling, analysis, and project management for public and private clients. Our employees help Admiralty Environmental deliver innovative, practical, and technically sound results and solutions — helping clients meet increasingly stringent environmental regulations and manage their systems to operate in an environmentally sound manner. To fulfill this mission, Admiralty Environmental is seeking entry-level environmental professionals who have a passion for working on challenging projects that will grow their professional skills.

## Job Requirements

Qualified candidate will have the minimum of:

- Undergraduate coursework in Geology, Biology, Chemistry, Environmental Sciences, or Engineering;
- Strong writing, communication, and computer skills;
- Ability to work in the field in industrial settings;
- Ability to work independently with limited supervision, as well as ability to work effectively as a part of larger teams. Frequent overnight travel will be required. Must be 21 or over.
